## RETRO – FIT KIT #400 SERIES

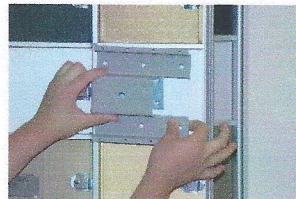

PART A to be attached to the nesting of the mailbox cabinet. This is the part of the mailbox that holds the mail.

PART A bracket can be used as a template to drill 3/8" holes on top and bottom shelf.

Replace the USPS door with the new one. This can be done by using a small flathead Screwdriver to squeeze the hinge pins down.

PART B to be attached to the master door, the grid. This is the part of the mailboxes where the USPS postal door is attached. The postal door is the door that holds the USPS lock which locks the grid to the cabinet.

Lock down the nuts with washers on the inside of the the USPS door.

The flathead screws are optional and can be installed by predrilling with a 1" drill bit.

Once the master door is installed with Retro Fit Kit, it will look like this.
